NOTICE AS TO TRADE MARK.

VICE-CHANCELLOR MALINS, November 3rd, 1869, gave a decision respecting Trade Marks, to the following effect :

"That every person using a Trade Mark, by the actual using of the same acquired a property in it, and had a right to prevent any other person from using it in such a way as would lead the public to believe they were purchasing one thing when in truth they were purchasing another."

J. H. HOPKINS & SONS, having discovered that Indents and Orders which have specified for their Stamped Tinned Holloware, under the well-known designation of "**Sphinx Holloware**," have found their way into other makers' hands, remind their Friends, and through them Consumers generally, that all articles of Stamped Tinned Holloware, as well as all other General Goods which they make, are marked with their Trade Mark of the Sphinx, and that, having adopted the Sphinx as their Trade Mark some years ago, it is their exclusive property.

J. H. HOPKINS & SONS also give notice that, as it is increasingly important to them that their Trade Mark and designation of the "**Sphinx**" and "**Sphinx Holloware**," should be well known as belonging to them and to their goods only, they will take immediate proceedings against anyone using their Trade Mark of the Sphinx, and use every legal means to prevent articles being sold under the designation of "**Sphinx Holloware**," "**Sphinx Tin Plate Ware**," &c., which are not their own make.

PREFACE TO FOURTH EDITION.

The distinguishing characteristics of this Edition are :

I. The completion of the Revision of Prices, which we have been carrying on since the last Edition was issued, many of which we have given due notice and particulars of from time to time in our Monthly Trade Circular. The calculation of every article has been carefully considered, on the basis of the present cost of raw material, and the prices fixed in accordance therewith at the lowest possible point. We have increased the discount on our "Red Book" ten per cent., and in some cases, where the great reduction in raw material had made our prices excessive, we have at the same time reduced the gross prices themselves. All those articles, however, on which we have already announced reductions, we have maintained at the reduction, increasing the gross prices so that they may be brought under the one uniform discount at which all the prices in the "Red Book" now are. By these means we feel sure this Book will be found to compare favourably with that of any other manufacturer.

II. This Book now incorporates in one the "Red Book," "Green Book," and "Blue Book."

The first contains all the articles of Tin Plate Ware, Patent and Block Tin Ware, Stamped Tinned Holloware, and Japanned Ware, usually made by the trade.

The "Green Book" includes all the articles made by the late T. WHITFIELD AND Co. (whose business we acquired), of Wrought-iron and Galvanized Holloware, and, in addition, our Machine-made Galvanized Buckets.

The "Blue Book" shows the articles of Bright Tinned Pressed Holloware made by our special process. These goods—made of Tin Plate re-tinned, or of Black Plate tinned and re-dipped, according as we find one or the other process more advantageous—we were the first to introduce into this country, and still remain the only manufacturers. These goods are of special quality and excellence, and receive our very careful attention. We are continually enlarging and extending this portion of our manufacture.

All these three Books are, as we have said, now combined in one, though either of the two latter can be had separately if desired. They are easily distinguished by the colours on the edges, which correspond to their designation.

J. H. HOPKINS & SONS.

September 15th, 1878.

P R E F A C E .

GRANVILLE WORKS, BIRMINGHAM.

July, 1874.

THIS, the first Edition of our "New Illustrated Pattern Book and Price List," is supplementary to our "Revised List of Prices," issued March 15, 1873, and fulfils the promise therein made of "re-engraving and re-arranging our 'Complete Pattern Book,' on a new and improved plan."

To this re-engraving and re-arrangement, we now beg leave to call attention in the following respects :

- I.—Every article has been carefully drawn to scale by our own artists;
and
- II.—Engraved with the greatest accuracy and care.
- III.—Articles of the same kind or class are grouped together on the same
and immediately succeeding plates.
- IV.—Full description and prices are given in letter-press opposite (generally)
each plate. The plates are all numbered with Roman Numerals,
and the letter-press is bracketed and numbered to correspond.

We do not know that this arrangement has ever been carried out in any of the Pattern Books in our trade, or that it has hitherto been thought worth while to bestow any great pains on the drawing of articles, or employ so much ability as, we think we may be excused for saying, our artists show they possess; but, however these may be, the advantages we think are manifest, and may be briefly stated as follows :

- I.—There is no exaggeration of an article's good points, nor lessening of its bad ones. It stands absolutely on its own merits, and at once does or does not commend itself to customers.
- II.—Two scales have been most generally made use of, viz., an eighth and a twelfth, but always articles of the same class have been drawn of the same scale, so that customers have the advantage of comparing the relative dimensions, and forming a correct estimate of the appearance as well as of the adaptability of articles.
- III.—Prices being printed separate from the engravings, much greater detail is attainable, and a better opinion can be formed of the make and value of an article than the use of other Pattern Books permits.

IV.—For a similar reason the Book, though it contains both drawings and prices, may be shown to buyers for the drawings, without any fear of their obtaining any idea of prices.

V.—Lastly we think the *greatest possible facility of reference* is given. A glance at the “Index to Plates” shows *at once* where an article, or class of articles, may be found. For, as we have already said, the same or similar articles are not scattered up and down the Book as if shaken out of a bag, but are carefully grouped together, and thus also the greatest possible ease in finding an article is associated with the advantage of being able at once to compare it, as to itself and its price, with another of the same kind or class.

In order to obtain greater uniformity, a few alterations of Numbers have been made, but we shall take care that no practical inconvenience is experienced.

Our “Pattern Book,” issued more than a quarter of a century ago, passed through eight or ten editions, till in 1863 we made the rather bold experiment of entirely revising and re-numbering it, and issued it as our “New Complete Pattern Book.” Happily, the arrangement found much favour, and it has passed through five large editions. We shall be much gratified if our Friends recognise in our “New Illustrated Pattern Book and Price List” still greater merit, and give to it a still larger share of their patronage.

We have only to add, it is not our intention to alter, at any future time, the Engravings themselves, the arrangement of the articles, their shapes or their Numbers; on the contrary, in respect of these we adopt this Book as our standard. But we purpose placing in a properly classified *Supplement* or *Appendix* all the new articles we shall from time to time produce.

We have several such articles in a forward state. They will in some instances be new in shape and use; some will be new as to shape only; others, probably the largest part, new neither as to shape or use, but improved only in make. We have no doubt, however, the *Supplement* will, in course of time, contain a large variety of these articles, and include everything most in demand.

J. H. HOPKINS & SONS.

CLASSIFICATION OF PLATES.

Articles for Miscellaneous Uses, viz. :

M	Articles for Housemaids	Plate LXXIV.
N	" " Colonial	Plate LXXV.
O	" " Dinner, Breakfast, and Luncheon ...	Plate LXXVI.
P	" " Medical	Plate LXXVI.
Q	" " Garden	Plate LXXVII.
R	" " Workshop	Plate LXXVIII.
S	" " Smoke Room	Plates LXXIX and LXXX.
T	" " Pantry	Plates LXXXI and LXXXII.
U	" " Entrance Hall	Plate LXXXIII.
W	" " Ship	Plate LXXXIV.
X	Tea Trays	Plate LXXXV.
Y	Moulds—Jelly, Pudding, Rice, and Cake ...	Plates LXXXVI to XCIX.
Z	Tinmen's Furniture	Plates C to CIV.

This classification is adopted as the most comprehensive and generally understood. It of course includes many articles constantly in use for Home Consumption, though equally well adapted for Foreign Markets ; and others, specially made for the requirements of the Export Trade, which also find a large and ready sale at home.

Dish Covers, on Plates I to III; Soup Tureens, Plate VI; Block Tin Waiters, Plate VII; Patent Tea and Coffee Pots, Plates VIII and IX; Cullenders, Plate XV; Tea Kettles, Oval Tea Pots, Plate XVI; French Coffee Pots, Coffee Boilers, Plate XVII; Pouring, Plate XVIII; Sugar Boxes, Plate XXV; Candlesticks, Plate XXVIII; Biers and Toilet Sets, Plates XXX to XL; Lamps and Bases, Plate XLI; Washstands, Plates XLIII to XLVII; Lanterns, Plates XLVIII to LII; Tea Trays, Plate LXXXV; Jelly Moulds, Timmer's Furniture.

Among the latter, especially all kinds of our improved Stamped Tinned Holloware, as Basins, Milk Pans; Dinner, Soup, and Bath Plates; Stewpans, Cops and Saucers, Baking Dishes and Pudding Pans, Preserving Pans, Canadian Kettles, Brass Placards, on Plates XIX to XXI; Dutch Kettles and Comfours, Cape Urns, Plate X; Camp Kettles, Hand-made Pudding Pans, Candle Moulds, &c., &c., Plate LXXV.

When favoured by merchants in this country with the indents of their Foreign correspondents, we always give to them our most careful attention, and the best consideration the then state of the markets will permit.

WHITFIELD

GREEN BOOK.

Description of Price List of Coal Vases.

93

*COAL VASES, of superior designs and best workmanship—
Japanned and finished in the best style; the better
qualities on Tinned Iron.*

THE ANNEXED COMPLETE LIST OF PRICES IS ARRANGED AS FOLLOWS—

The first column contains the Name.

The second column contains the Number.

The third column contains the Price of the Vase in Plain Black, hand polished.

The fourth column contains the Price Extra for Linings.

The succeeding columns contain the Prices for the different Qualities of Ornamentation.

The rows of figures printed in red ink, 08, 010, &c., stand for the different Qualities of Ornamentation: thus—08, 012, stand for a Bronze Fillet; 08, 010, 012, 015, 016, stand for different Qualities of Metal Borders; 018 and upwards denote slight Burnished Gold Borders, gradually increasing in richness up to the most elaborate designs, including richly-painted and highly-finished Scenes in Oils. Underneath the red ink figures, in the vertical columns, will be found the Price of each Vase ornamented.

It should be noted that the Plain Black Prices include China-handled Hand Scoops to all, except all shapes of Purdonians. Also, that on oval Purdonians (No. 1636) slight Gold Borders begin at 012.

Purdonian Coal Vases.

120 *Description of Price List of Tea Trays, &c.*

*TEA TRAYS, ROUND WAITERS, AND BREAD BASKETS,
in Iron, Paper, and Genuine Papier-Mache.*

THE ANNEXED LIST OF PRICES IS ARRANGED AS FOLLOWS—

The Numbers in the first column indicate the Quality of the Ornament.

No. 03 to 010 are Metal Borders.

No. 06 is the Price for Fillets.

No. 012 to 020 are Burnished Gold Borders.

No. 024 and upwards are Superior Gold Borders.

These Numbers correspond for each different shape Tray, so that the Prices of the same quality Ornament can be at once known, supposing the shape required be either or both Oval, Best Oval, Elgin, &c.

Every Tray sent out has on the back a Number corresponding to one of the Numbers in the first column, by which the Prices can be checked, and the Price of any one size on the same or any other shape or quality easily ascertained.

LIST OF PRICES

OF

GALVANIZED & WROUGHT-IRON

TINNED HOLLOWARE

AND

MACHINE-MADE GALVANIZED

BUCKETS.

GREEN BOOK.

P R E F A C E .

WE have at length the pleasure of issuing to our friends the first complete Illustrated Edition of our WROUGHT IRON AND GALVANIZED HOLLOWARE BOOK.

When we succeeded to the business carried on for so long a time by the late firm of T. WHITFIELD & Co., we resolved to attempt two things, viz.:

To re-establish the good name of the late firm for quality; and

To place the prices of our goods on a footing at once satisfactory to our friends and ourselves.

We think we may feel satisfied that we have done the first from the increasingly extensive orders we are receiving; and for a like reason we hope to find it allowed that this book secures the second.

As our First Edition—and remembering the great labour required to go through the calculation of every article in every size—we have no doubt errors will be noticed, and discrepancies pointed out. We shall be greatly obliged where this is done, and give our best attention to rectifying both in a future edition; and shall also be very glad to accommodate our prices to the requirements of our customers when possible, in conformity with the principle of fair pay for fair work.

The manufacture of our Wrought Iron and Galvanized Holloware is carried on in our Holliday Street Works, shown on annexed page.

J. H. HOPKINS & SONS.

1876.

GREEN BOOK.

CLASSIFICATION OF PLATES.

PLATES.

I to IX—Articles for the Kitchen.

X—Sack Fillers, Skips, Measures, and Hoppers.

XI—Boiler Fillers, Watering Pot, Milk Can, and Well Buckets.

MACHINE-MADE GALVANIZED BUCKETS.

Buckets of the following numbers (including both seamed and riveted), viz, Nos 360, 361, 362, 364, 366, on Plate XIII, are all MACHINE-MADE. They have secured a wide celebrity for the following important advantages:

Superiority in strength.

„ finish.

„ shape.

„ capacity.

By our process of manufacture, Seamed Buckets are practically watertight, even before galvanizing, and Riveted Buckets are much more strongly put together.

The capacity of the 361 to 366 Buckets is much greater than that of all other cheap Buckets, and in all we secure a faultless shape and generally capital appearance.

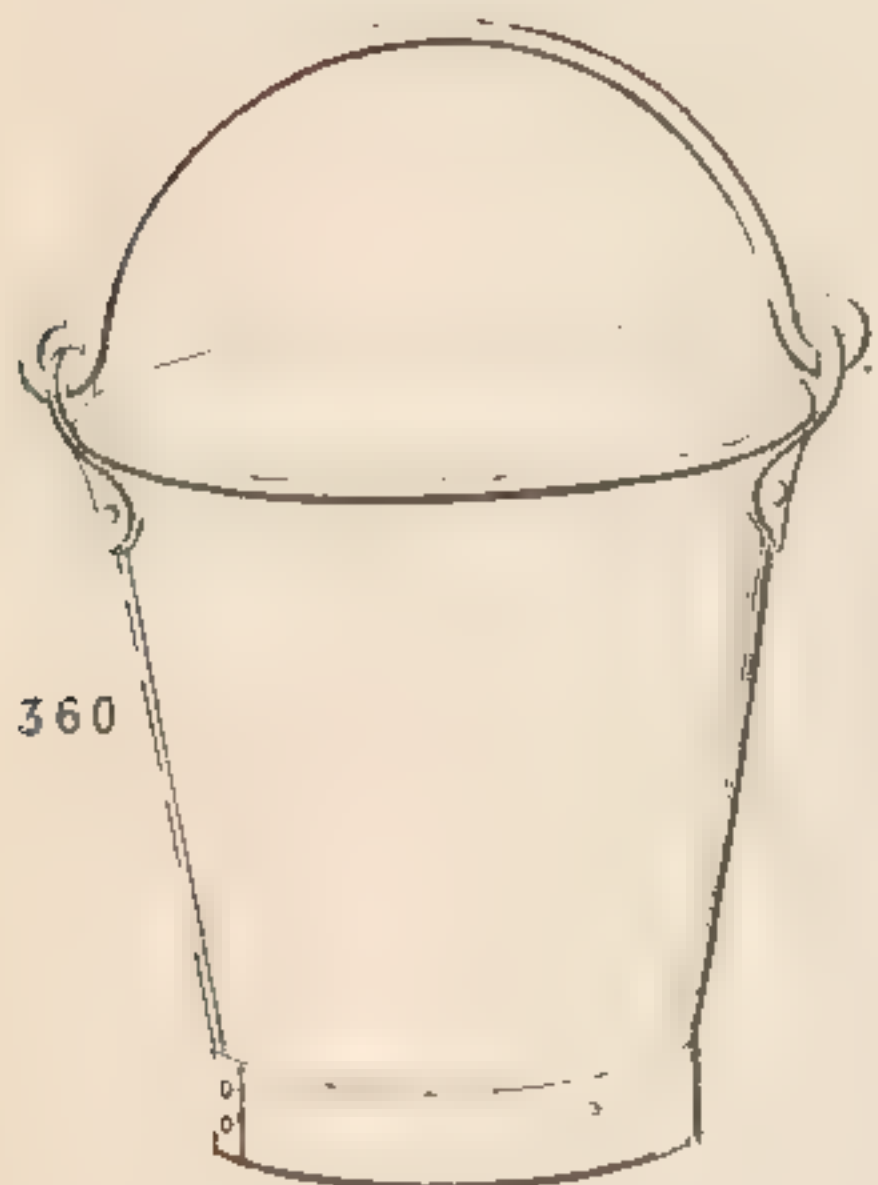

J. H. HOPKINS & SONS,

GRANVILLE WORKS, BIRMINGHAM.

Machine-made—

BLUE BOOK.

LIST OF PRICES
OF
MACHINE-MADE IMPROVED
BRIGHT TINNED PRESSED
AND
STAMPED TINNED HOLLOWWARE.

BLUE BOOK.

P R E F A C E .

THE Articles illustrated in the following pages are all Machine-made on improved principles—of very superior appearance, finish, and durability, and very low in price.

We have usually a considerable stock, and can execute orders very promptly. These goods are manufactured in our William Street Works.

This Book (to which we shall add from time to time through the medium of our Monthly Trade Circular and otherwise) we call, for the sake of distinction, the "Blue Book"—just as our ordinary Tin and Iron Plate Wares, usual Stamped Tinned Hollowares, and Japanned Wares manufactured in our Granville Street and Berkley Street Works are contained in our "Red Book," and our Wrought and Galvanized Hollowares (late J. WHITFIELD & Co.) manufactured at our Berkley Street Works are shown in our "Green Book."

BLUE BOOK.

CLASSIFICATION OF PLATES.

PAGE

- 1—Plates—Dinner, Soup, and Bush.
- 2—Basins, Bowls, and Pudding Pans.
- 3—Cullenders and Hand Bowls.
- 4—Adelaide, Emigrant, and Pudding Pans.
- 5—Saucepans, Bellied and Straight.
- 6—Omelette Pans, Round and Oval.
- 7—Coffee Pot and Dust Pan.
- 8—Oil Bottle, Oil Filler, and Cake Mould.
- 9—Ladles, Porringer, Saucer, and Ladle Bowl.
- 10—Ladles.
